And the adventure continues

What an extraordinary year we have had. Now Covid is slowly leaving our daily system, we ask ourselves: what's next? A lot has changed in the way we work; less travel means more online. That's why we have invested a lot in our systems and people in the past year.

Nothing is obvious anymore, so wanting more is no longer a given thing. We at NDT International know how we want to move forward; we want to move forward with guarantee of delivery and well selling products. We will achieve this through our close cooperation with both our suppliers and customers!

With a lot of energy we have worked on this new collection, we hope you will enjoy it as much as we do.

Stay safe and healthy!
Bart en Jasper Jansen

Sustainability

Step by step we are working to make NDT International's operations as sustainable as possible. All lighting has already been replaced by energy-efficient LED lamps. This change has halved consumption from 97,000 kilowatts to 48,000 kilowatts. In addition, optimum use is also made of recycled packaging materials. In the factories and family businesses that NDT works with, the environmental regulations known in the Netherlands are enforced. In the philosophy of NDT International, these kinds of measures are seen as necessary to keep the chain closed. Summarized, sustainable business practice is of primary importance. However, NDT is always looking for new opportunities to improve and innovate in the field of social and responsible business. Step by step towards a greener world!

5585 solar panels have also been installed on the roof of NDT's head office in Gendt. These panels provide power for more than 400 homes! Would you like to know more? Check out the QR code below.

How it's made

SCAN FOR MULTIPLE
LANGUAGES!

Each of our pots is unique. Many of our products are handmade or finished by hand. Because of this traditional and respectful craft process, each product has its own unique appearance!

In addition, each pot is made of different types of clay, the mixing of which is an important process because the clay determines the quality of our products. Nice to know; this clay is always bought locally!

Next, the pots are produced in different ways. An important technique are handmade pots. Also many pots are already machine pressed, but then finished by hand.

The most important thing is that a pot like this lasts almost a lifetime. This makes our products sustainable and valuable.
